

# Full Frame Aerial Imaging

**Brumat Photo and Foersom Sàrl are specialists in aerial photo and video productions.**

**We create aerial photography and videos by remote piloted octo-copter. With its 8 propellers and electric motors, the octo-copter provides a stable, quick and noiseless flight. Its GPS receiver and video transmission assures precise flight navigation.**

**We photograph with full frame cameras with up to 36 million pixels imaging. Video filming in Full HD with 50P image rate for high quality video result.**

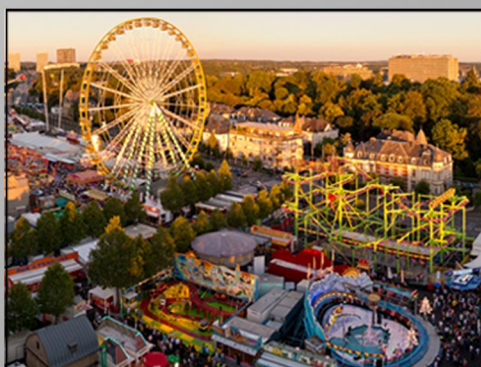

**Experienced in working with engineering and architectural offices, construction entrepreneurs, public administrations and aerial photography at construction sites.**

**At the start of each aerial photo project we create a flight plan for the area and obtain flight agreement with landowner. The flight plan is sent to Direction de l'Aviation Civile (DAC) which issues the flight permit for the operation.**
